Lymphedema Compression Product Selection Guide

SIGVARIS
GROUP

Clinical Solutions

For the treatment and management of lymphedema

Compreflex® Contain **CALF**

sigvaris

Compression level

20–50mmHg

Billable under

HCPCS code **A6583**

Features and benefits

- Provides **2x more containment** than other Compreflex products to address lower extremity lymphedema
- Garment features a moderately-contoured calf design to fit edematous legs
- 20–50mmHg of adjustable, gradient, inelastic compression
- Stretch panel holds garment in place for easy application and high compliance
- Transition Liners feature an antimicrobial wash for bacteriostatic properties and odor control and an average of 10–15mmHg of compression in the foot and ankle

Best suited for

- Lymphedema
- Edema
- Lipedema

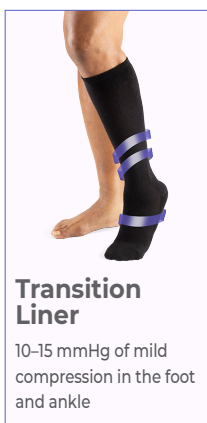

Colors

Black, Beige

Includes

- Compreflex Contain Calf
- 1 Pair of Transition Liners

Transition Liner

10–15 mmHg of mild
compression in the foot
and ankle

Compreflex Contain Strap Extender

- Provides up to 10cm of additional length to a single strap
- 1 unit extends 1 strap
- Detaches easily
- For patients outside of standard size range of Compreflex Contain calf wrap
- This Strap Extender works only with the Compreflex Contain wrap

Compreflex Standard THIGH

Billable under

HCPCS code **A6585**

The Compreflex Standard Thigh is an inelastic compression device for the thigh. The product includes a set of Accutab® Devices, a pair of non-compressive cotton liners, and a Belt and Hip attachment to support the product throughout daily use.

Compreflex Standard KNEE

The Compreflex Standard Knee is an inelastic compression device for the knee. The product includes a set of Accutab Devices, and a Butterfly Strap for added compression to the popliteal or patella regions.

Foot Compression Wear

Compreboot® Lite Foot

Billable under

HCPCS code **A6587**

Compression

Variable

- Ultra-thin profile that easily fits into most footwear
- Highly adjustable design may be trimmed to fit
- Provides mild, therapeutic compression

Compreboot Standard Foot

Billable under

HCPCS code **A6587**

Compression

Variable

- Four-way stretch for firm compression around ankle
- Ideal for mild to moderate chronic edema
- Low stretch material conforms to foot shape

Foot compression garments are pictured with the Basic Liner. Basic Liner is not included.

Complete Decongestive Therapy (CDT) Aid in 3 easy steps

The Sigvaris Compreflex Reduce is an innovative compression system used during the decongestive phase of lymphedema therapy. A replacement for tedious traditional bandage wrapping, the Compreflex Reduce is easy to size, simple to assemble, and conveniently adjustable during daily wear.

The Compreflex Reduce garment promotes patient independence and encourages adherence to a planned treatment protocol. Key features include an interior stretch panel which holds the garment in place and Tension Tabs, which are visual indicators that clearly show where to position straps. Each garment may be combined with foam or other padding materials to promote gradient and maximize lymphatic drainage.

The Compreflex Reduce line of products includes garments for the foot, calf, knee, and thigh.

Compression level

20–50mmHg

Best suited for

- Lymphedema
- Patients in the decongestive phase of lymphedema treatment

Colors

Black, Beige

Compreflex Reduce CALF

Billable under

HCPCS code **A6583**

The Compreflex Reduce Calf provides firm gradient compression to the calf. A non-compressive cotton liner is included. Pair the Compreflex Reduce Calf with the Compreflex Reduce Foot for complete below knee compression.

Compreflex Reduce KNEE

The Compreflex Reduce Knee provides firm gradient compression to the knee. Pair the Compreflex Reduce Knee with the Compreflex Reduce Foot, Calf, and Thigh for full leg compression.

Compreflex Reduce THIGH

Billable under

HCPCS code **A6585**

The Compreflex Reduce Thigh provides firm gradient compression to the thigh. Comes with a non-compressive cotton liner, and a Belt and Hip attachment are included to help secure the thigh garment in place. Pair the Compreflex Reduce Thigh with the Compreflex Reduce Knee for upper leg compression.

Compreflex Reduce FOOT

Billable under

HCPCS code **A6587**

The Compreflex Reduce Foot provides firm gradient compression to the foot and ankle. Pair the Compreflex Reduce Foot with the Compreflex Reduce Calf for complete below knee compression.

Compreflex Reduce LOBE SLING

Billable under

HCPCS code **A6584**

The Lobe Sling is intended for use with the Compreflex Reduce Foot, Calf, Knee, and Thigh available for the lower extremity. This trim-to-fit lobe sling lifts and compresses areas exposed outside of the garment and pairs well with our Therapy Supplies, Grayfoam, Wavefoam, Wavefoam II to support the patient during treatment.

Compreflex Standard

ARM

sigvaris

The Compreflex Standard Arm is an inelastic compression device that features an inner sleeve for easy application and a patented 90° Flexi-Zone™ for improved movement at the elbow joint. The Compreflex Standard Arm may be paired with the Dorsal Pocket Glove™ for compression in the hand.

Compression level

20–30mmHg

Billable under

HCPCS code **A6588**

Features and benefits

- Lightweight, low-profile compression garment provides mild to moderate compression and containment with improved comfort
- The 90° Flexi-Zone allows elbow movement, providing the range of motion needed to complete everyday tasks
- The adjustable fit paired with the padded axilla and wrist ensure comfortable daytime or nighttime wear
- Garment secures in place with the inner sleeve for easy, one-handed application

Best suited for

- Lymphedema
- Post-surgical edema
- Non-specific edema

Colors

Black, Beige

Includes

- Compreflex Standard Arm
- 1 Pair of non-compressive Cotton Liners
- 1 Butterfly Strap

Medaform® Standard

ARM AND GLOVE

Sigvaris Medaform garments are for nighttime use by individuals in the advanced stages of lymphedema. Patients with Stage II or III lymphedema benefit from the pressure ridges the inner padded Wavefoam liner creates. These high/low pressure ridges direct the lymph fluid and promote drainage. The straps and inner foam liner of the Medaform garment are replaceable, offering a durable, long-term solution for the treatment and maintenance of lymphedema.

Compression level

30–40mmHg

Billable under

HCPSC code **A6522**

Features and benefits

The Medaform Standard Arm provides firm, gradient compression from the hand to the axilla. The Medaform Standard Arm includes the Medahand. The Medahand provides comfortable, moderate compression for the hand.

Best suited for

- Lymphedema
- Fibrotic tissue

Color

Blue & Black

Includes

- Medaform Standard Arm (upgraded Hand options are available at an additional cost)
- Medahand (HCPSC code **A6520**)
- 1 Pair of non-compressive Cotton Liners
- Donning Loop
- Unistrap

Secure ARMSLEEVE

sigvaris

The Secure Armsleeve combines compression and containment with comfort and durability that's optimal for managing lymphedema.

Compression level

15–20mmHg • 20–30mmHg

Billable under

HCPCS code **A6578** (Armsleeve)

HCPCS code **A6581** (Glove)

HCPCS code **A6582** (Gauntlet)

Features and benefits

- More graduated compression and containment than traditional garments
- Provides UPF 50+ sun protection
- Matching Gloves and Gauntlets available

Fiber content

- 78% Nylon, 22% Spandex (Armsleeve)
- 60% Nylon, 40% Spandex (Glove, Gauntlet)
- Non-latex

Best suited for

- Chronic edema
- Lymphedema that is well-managed
- Post-operative edema
- Post-mastectomy care

Colors

Dusty Rose, Beige, Cocoa, Black

562GM78
Gauntlet Medium in Beige

562FM78
Glove Medium in Beige

Secure Lite

ARMSLEEVE

The Secure Lite Armsleeve combines ultra-soft materials with a seamless design to manage and prevent lymphedema with maximum comfort.

Compression level

15–20mmHg • 20–30mmHg

Billable under

HCPCS code **A6578** (Armsleeve)

HCPCS code **A6581** (Glove)

HCPCS code **A6582** (Gauntlet)

Features and benefits

- Soft, comfortable materials that glide on and off with ease
- Micro-dot grip-top band to ensure garment stays in place all day long
- Provides UPF 50+ sun protection
- Matching Gloves and Gauntlets available

Fiber content

- 69% Nylon, 31% Spandex (Armsleeve)
- 60% Nylon, 40% Spandex (Glove, Gauntlet)
- Non-latex

Best suited for

- Chronic edema
- Lymphedema that is well-managed
- Post-operative edema
- Post-mastectomy care

Compresshort®

SHORT & CAPRI

sigvaris

The Compresshort offers mild, supportive compression for the treatment of genital, abdominal, and upper thigh edema. Patients with lymphedema, edema, and lipedema benefit from the therapeutic compression and support this garment provides. Available in short and capri lengths.

Compression level

10–15mmHg

Billable under

HCPCS code **A6570**

Color

Black

Compreshape™

SHORT & CAPRI

Using premium material that is designed to be worn as outerwear, the Compreshape offers mild, supportive compression for the treatment of genital, abdominal, and upper thigh edema. The stylish waistband and the smooth seams give an attractive appearance. Patients with lymphedema, edema, and lipedema benefit from the therapeutic compression and support this garment provides. Available in short and capri lengths.

Compression level

10–15mmHg

Billable under

HCPCS code **A6570**

Color

Black

Neck and Mandible Pad

The Neck and Mandible Pad is made from soft materials that conform to the mandible and neck. The Neck and Mandible Pad provides mild compression and uses easily adjustable straps that secure the garment in place.

Compression level

8–10mmHg

Billable under

HCPCS code **A6566**

Best suited for

- Lymphedema
- Post-surgical or non-specific edema

Color

Black

Comprevest

The Comprevest offers mild to moderate compression to the chest and back. Designed for an improved fit and overall comfort, the Comprevest includes wide straps and adjustable hook closures. The Comprevest is offered in sizes Small to XX-Large with cup sizes A/B–DD.

Compression level

15–25mmHg

Billable under

HCPCS code **A6568**

Best suited for

- Post-surgical procedures including mastectomy, lumpectomy or radical reconstruction
- Lymphedema

Color

Black

**Soft, comfortable, padded,
massaging nighttime wear**

Sigvaris Chipsleeve garments are made for the upper and lower extremity. Filled with chip foam, each padded product is designed with directional channels, which work to efficiently direct lymph fluid and promote drainage. Patients with fibrotic limbs will enjoy the comfortable fit and massaging effect of the chip-filled garment.

Each Chipsleeve garment is made of four-way stretch fabric. The fabric contains moisture-wicking properties and is bacteriostatic to help control odor.

Compression level

15–20mmHg

**Features and benefits**

- Channels designed to direct the flow of fluid
- Open-cell foam chips massage tissue and stimulate fluid movement
- Each Chipsleeve garment is made with moisture-wicking material

Best suited for

- Lymphedema

Color

Black

**Includes**

- Chipsleeve garment
- Oversleeve in Black (not pictured)
- 1 Pair of non-compressive Cotton Liners

Chipsleeve CALF & FOOT

Billable under

HCPCS code **A6524**

The Chipsleeve Standard Calf and Foot garment provides mild to moderate gradient compression from the foot to knee. The garment is a single piece that easily glides onto the limb. Includes a black oversleeve for additional compression.

Black oversleeve not shown.

Chipsleeve ARM AND GLOVE

Billable under

HCPCS code **A6522** and **A6520**

The Chipsleeve Standard Arm provides mild to moderate gradient compression from the hand to axilla. Includes a black oversleeve for additional compression.

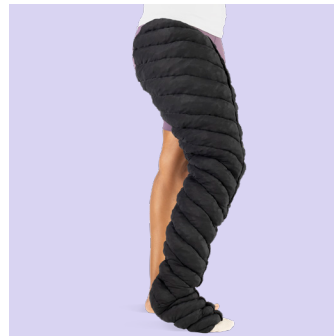

Black oversleeve not shown.

Chipsleeve FULL LEG

Billable under

HCPCS code **A6526**

The Chipsleeve Full Leg garment provides mild to moderate gradient compression from the foot to the gluteal fold. Includes a black oversleeve for additional compression.

Black oversleeve not shown.

Medahand

Billable under

HCPCS code **A6520**

- Open-cell foam chips to gently massage tissue
- Conforming design to ensure proper fit and gradient compression
- Breathable, moisture-wicking, anti-odor, and soil-release fabric

Black oversleeve not shown.

The Chipvest is a custom, upper-body compression garment that offers mild to moderate compression for individuals with lymphedema.

The product contains open-cell foam chips that help to soften fibrotic areas. The chip foam is formed into channels to help direct lymph fluid and facilitate drainage. To improve fit and comfort, the garment includes a back drawstring and corset design as well as hook and loop shoulder straps that are easily adjusted by the patient. Clinicians may further customize the product by selecting the location of the foam (unilateral or bilateral).

Gradient compression garment accessories

Accessories and donning aids help patients manage their care by maximizing garment usage and providing additional comfort.

Billable under

HCPCS code **A6593**

Latex-Free Gloves

Gripping donning gloves recommended for use in a non-latex environment.

Sim-Slide® and Magnide On/Off®

These products feature a special coating that reduces friction when putting on and taking off open-toe and closed-toe compression stockings.

Sigvaris DOFF N' DONNER®

A soft device that makes it simple to put on and remove all styles of graduated compression garments. It is perfect for both self-donning and caregiver use. Non-latex.

Sigvaris DOFF N' DONNER CONE

This loading device makes it easy to roll stockings onto the Sigvaris DOFF N' DONNER. The bottom of the base firmly attaches to most clean, flat surfaces via suction.

MELANY®

The donning and doffing device for compression stockings in case of limited mobility.

Foot Slip

Comfortable applicator for use with open toe stockings.

Biaform

Billable under

HCPCS code **A6599**

- Case holds 20 rolls
- Premium short stretch bandage with durability
- Product offers superior stretch and conforming abilities

Size	Qty

10cm x 10m	1 Case
12cm x 10m	1 Case

Stockinette

Cotton Stockinette

Billable under

HCPCS code **A6607**

Cotton Stockinette is available in a range of sizes to fit almost any application. Product is 100% Cotton.

Size	Qty
3" x 25yds	1 Roll
4" x 25yds	1 Roll
5" x 25yds	1 Roll
6" x 25yds	1 Roll
8" x 25yds	1 Roll

Biagrip

Billable under

HCPCS code **A6607**

Compressive stockinette, which may be washed and reused to augment compression garments. Product may be cut to size.

Size	Qty
D 3" x 11yds	1 Roll
E 3.5" x 11yds	1 Roll
F 4" x 11yds	1 Roll
G 5" x 11yds	1 Roll
J 7" x 11yds	1 Roll
K 8" x 11yds	1 Roll

Gauze

Elastosoft

Billable under

HCPCS code **A6596**

Soft cotton elastic gauze. Ideal for wrapping fingers & toes.

Size	Qty
1" x 4.1yds	1 Bag / 24 Rolls
2" x 4.1yds	1 Bag / 12 Rolls
3" x 4.1yds	1 Bag / 12 Rolls
4" x 4.1yds	1 Bag / 12 Rolls

Foam

Grayfoam

Billable under

HCPCS code **A6600**

Moderately rigid open-cell foam helps to soften fibrotic areas. The product provides firm, stable support under Biaform short-stretch bandages.

Size	Qty
1/4"x18x72"	1 Sheet
1/2"x18x72"	1 Sheet

Wavefoam

Billable under

HCPCS code **A6603**

One-sided. High-pressure ridges gently massage thickened fibrotic areas, while low-pressure channels allow pathways for fluid evacuation.

Size	Qty
1.2cm x 69cm x 90cm	1 Sheet

Wavefoam II

Billable under

HCPCS code **A6603**

Two-sided. High-pressure ridges gently massage thickened fibrotic areas, while low-pressure channels allow pathways for fluid evacuation. Ridged or wave pattern is on both sides of the sheet.

Size	Qty
1.2cm x 69cm x 90cm	1 Sheet

Padding

Biasoft

Billable under

HCPCS code **A6606**

Case holds 10 rolls. Soft, durable, and seamless fleece padding for use under short stretch bandages. The product may be machine washed and dried for repeated use.

Size	Qty
6cm x 3m	1 Roll
6cm x 3m	1 Case
10cm x 3m	1 Roll
10cm x 3m	1 Case
15cm x 3m	1 Roll
15cm x 3m	1 Case

Non-woven

Billable under

HCPCS code **A6606**

Soft Synthetic Padding. Case holds 30 rolls. Optimal for use under short stretch bandages.

Size	Qty
10cm x 3.5m (4" x 3.8yds)	1 Case

Complete Liner

Billable under

HCPCS code **A6593**

- 10-15mmHg in foot, ankle, and calf
- Comfortable knee-high liners
- Extra thick sole from toe to heel for added comfort
- Antimicrobial treatment for bacteriostatic properties

Transition Liner

Billable under

HCPCS code **A6593**

- 10-15mmHg in foot and ankle
- Soft, flat seam knee-high liners
- Extra thick sole from toe to heel for added comfort
- Antimicrobial treatment for bacteriostatic properties

Basic Liner

Billable under

HCPCS code **A6593**

- Non-compressive, protective, moisture-wicking liner
- Smooth toe seam for added comfort
- Antimicrobial treatment for bacteriostatic properties

Foam Liner

Billable under

HCPCS code **A6593**

- High density, open-cell foam with breathable, moisture-wicking mesh lining
- May be paired with inelastic wraps or worn separately

Cotton Socks & Liner

Soft, seamless cotton liners are non-compressive and can be worn under other compression products.

Chip Pad Dorsum

Billable under

HCPCS code **A6593**

Ideal for use on dorsum of hand or foot. Helps underneath compression bandages over pockets of lymphedema. Fits into Dorsal Pocket Glove.

Size	Single
Small	2231-DO (8cm x 9cm)
Large	2233-DO (9cm x 14cm)

Chip Pads

Chip Pad bra is easily inserted into the interior side pocket of the Comprevest

Billable under

HCPCS code **A6593**

For added stimulation of the affected area, pair the Comprevest with the Chip Pad Bra. With chip foam sewn into channels, the Chip Pad Bra massages and breaks down fibrotic tissue caused by edema or radiation, while the channeling directs the fluid for drainage. The Chip Pad Bra is designed to be inserted into the interior side pocket of the Comprevest.

Chip Pad Bra Half

Cup: 20cmX20cm
Extension: 15cm
Total Length: 35cm
Width: 14cm
